Opis a príklady úloh ôsmej skupiny (úlohy 141-160)

Teraz sa vám predkladá 5 kociek a, b, c, d, e. Na každej kocke je 6 rozličných znakov. Tri z nich možno vidieť.

Každá z úloh 141-160 ukazuje jednu z predložených kociek v zmenenej polohe. Máte zistiť, o ktorú z predložených kociek ide. Túto kocku mohli otočiť, prevrátiť, alebo aj otočiť aj prevrátiť. Prítom sa môže, pravda, objaviť aj nový znak.

Ešte upozorňujeme, že predložené kocky a, b, c, d, e sú rozdielne kocky. Majú síce významné rovnaké znaky, ale v rozličných polohách.

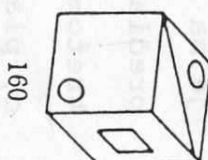

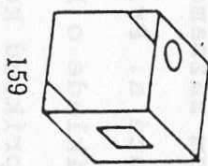

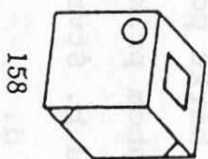

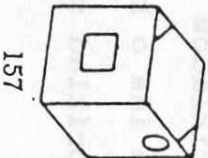

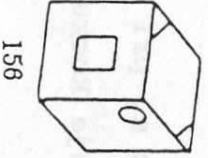

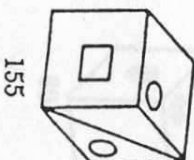

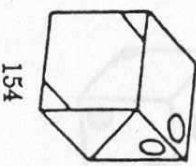

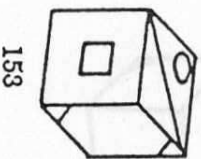

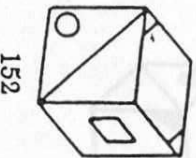

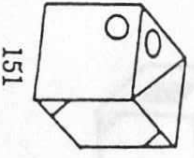

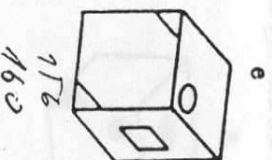

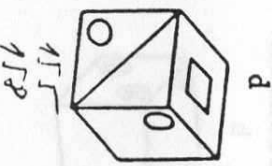

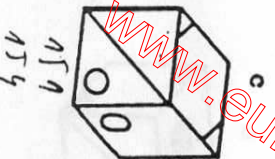

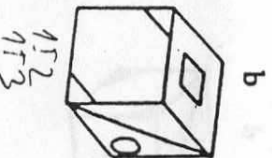

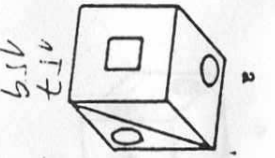

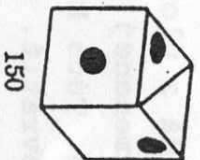

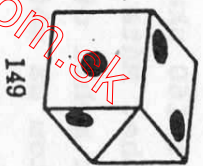

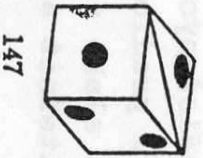

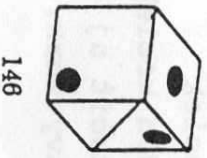

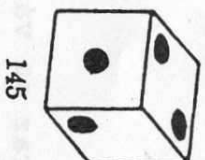

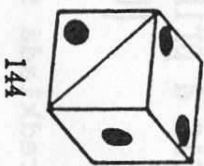

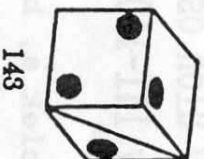

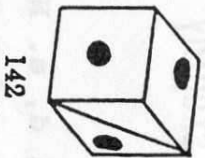

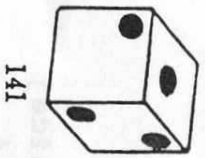

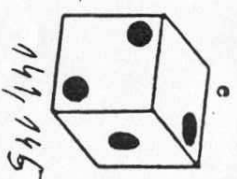

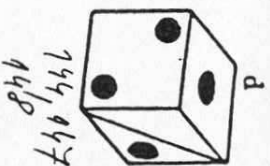

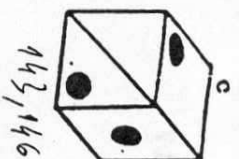

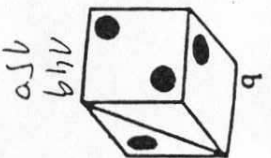

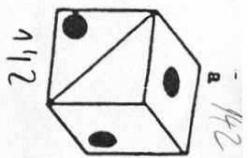

08 - Tento príklad ukazuje kocku a v zmenenej polohe, preto

je na vašom záznamovom hárkku pod príkladom 08 precíarknuté a. Pri druhom príklade ide o kocku e, pri treťom príklade o kocku b. Štvrtý príklad ukazuje kocku c, piaty príklad kocku d.

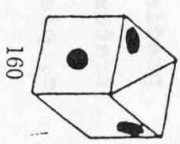

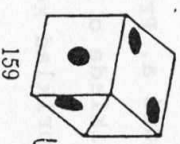

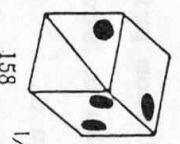

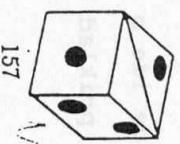

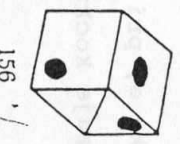

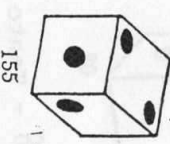

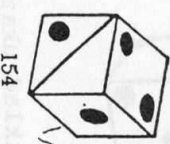

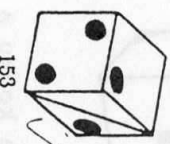

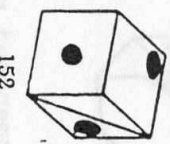

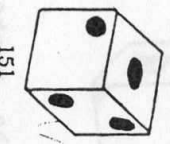

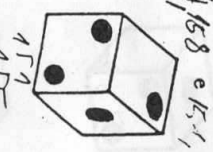

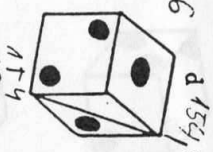

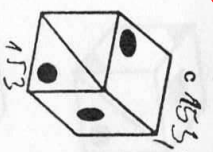

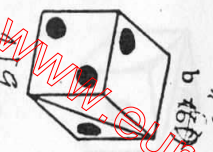

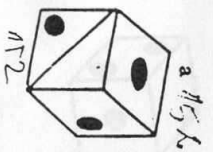

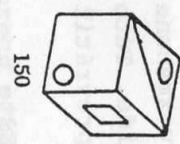

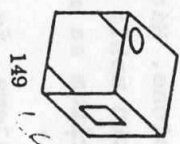

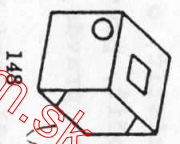

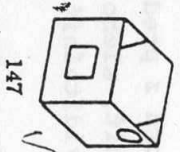

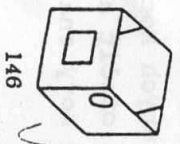

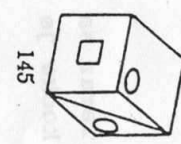

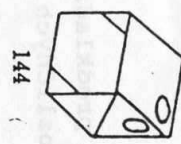

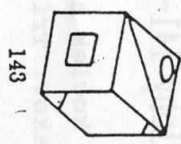

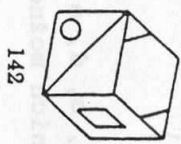

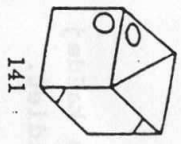

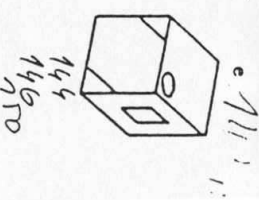

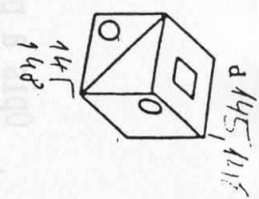

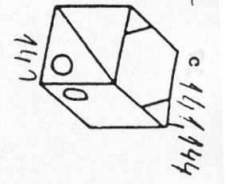

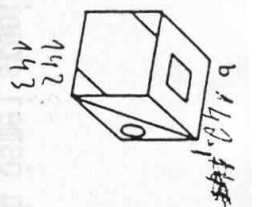

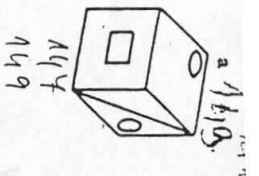

Neobracajte prosím list, kým nedostanete na to pokyn!
Čakajte na výzvu k ďalšej práci!
